

WILLIAM R. L. BARBOSA

FULL STACK ENGINEER

CONTACT

+351 914 063 379
williampgm@gmail.com
Alcobaça, Leiria, Portugal

CORE SKILLS

Backend: Node.js, NestJS, PHP, Laravel, Symfony, REST APIs, BullMQ, RabbitMQ
Frontend: React, Next.js, AngularJS, TypeScript, JavaScript
Databases: PostgreSQL, MySQL, SQL Server
Cloud/DevOps: AWS, Docker, Linux, PM2, CI/CD, Cloudflare
Tools: Jira, Redis, RabbitMQ, BullMQ, PM2, GitHub Copilot, Docker, AWS, Linux

EDUCATION

Bachelor's Degree – Computer Science, ITE – Brazil, 2017
Technical Degree in Information Technology, CTI – Technical School of UNESP – Brazil, 2012

LANGUAGES

Portuguese
English
Spanish
Italian

Results-driven Full Stack Engineer with solid experience developing scalable web platforms, high-performance APIs, and business automation tools. Strong technical background in Node.js, NestJS, React, Next.js, PHP, AWS, PostgreSQL, Redis, and implementing CI/CD pipelines. Committed to high code quality through well-documented tasks and PRs, focusing on delivering effective and sustainable technical solutions.

EXPERIENCE

Full Stack Engineer

Maytech IA - *Remote - August 2025 - Present*

Developed an insurance CRM and debt collection platform focused on automating communication and improving sales and collections workflows.

- Built automated messaging workflows for leads and overdue payments using **BullMQ** for reliable background processing.
- Integrated **Meta Official WhatsApp API** for high-volume messaging, including template management and delivery automation.
- Developed Kanban-based dashboards to support sales and collections teams in tracking and managing customer pipelines.
- Implemented **third-party API integrations** to synchronize client, billing, and insurance data in real time.

Tech: NestJS, Next.js, PostgreSQL, Redis, BullMQ, AWS, N8N

Full Stack Engineer

Freelancer - *Remote - December 2024 - August 2025*

- Developed custom web applications and APIs for multiple clients end-to-end.
- Built a road race management platform supporting 80k+ simultaneous users during peak registrations.
- Improved performance and stability through Redis caching and database optimization.
- Implemented payment integrations, rankings, certificates, and real-time race tracking features.
- Built commission automation systems integrated with TOTVS Protheus ERP.

Tech: Node.js, NestJS, Next.js, PHP, AngularJS, Redis, BullMQ, AWS, MySQL, PostgreSQL,

Technical Project Manager/Back-end Developer

RX Redefined - *Remote - May 2022 – November 2024*

- Managed project lifecycle from planning to delivery in Agile environments.
- Led engineering execution, backlog refinement, and cross-team communication.
- Improved deployment reliability with CI/CD pipelines.
- Contributed to observability initiatives using DataDog.
- Built product features using Node.js, React, and PostgreSQL.

Tech: Node.js, express, CircleCI, Datadog, AWS, PostgreSQL, SCRUM

● Full Stack Engineer

Previous roles - 2019-2022 *Worked across ERP, invoicing, tax intelligence, and SaaS products*

- Built tax analysis systems using AI concepts.
- Integrated payment gateways and financial tools.
- Migrated workloads to AWS (EC2, S3, RDS).
- Developed APIs, internal systems, and containerized applications.

Companies: Companies: Recebe Digital, Grupo DFranquias, Auditor NFE

● Full Stack Engineer

Codeware Sistemas - *Bauru/SP* | 2016 – 2019

- Delivered custom web and mobile solutions for multiple clients.
- Led technical delivery, architecture decisions, and client relationships.

SOFT SKILLS

- **Proactive problem solver**, focused on delivering effective and sustainable solutions.
- **Strong communication skills**, fostering clarity and collaboration between developers, stakeholders, and clients.
- **Detail-oriented**, with a consistent habit of writing well-documented code, tasks and PRs.
- **Ownership mindset**, always committed to quality and continuous improvement.

KEY ACHIEVEMENTS

- Engineered a sports event platform **supporting 80k+ concurrent users** during peak registration windows.
- Reduced production response times by approximately **40% through Redis caching, query tuning**, and backend optimization.
- Built automation workflows for CRM and collections operations, reducing manual tasks and improving team productivity.
- Delivered end-to-end features across web platforms, including APIs, dashboards, payment integrations, and internal tools.
- Developed and maintained production systems across backend, frontend, databases, and third-party integrations.
- Helped launch multiple startup products from concept to MVPs to production-ready platforms.
